

CLAIMS

What is claimed is:

1. A console lid mounted screen comprising:

5 a console lid positioned over a console for pivotal movement relative thereto; and

a display screen mounted in a movable frame pivotally positioned within an interior compartment of said lid to allow said frame and said screen to move between at least two positions relative to said lid.

10 2. The console lid mounted screen of claim 1, wherein said lid can pivot between an open position and a closed position.

3. The console lid mounted screen of claim 2, wherein when said lid is in said open position, the storage bin of said console is accessible.

4. The console lid mounted screen of claim 3, wherein the bottom side of said interior compartment is comprised of a substantially rigid material.

15 5. The console lid mounted screen of claim 4, wherein one of said positions of said frame is the closed position and when said frame is in said closed position, said screen is hidden from view and said lid has a substantially flat profile.

20 6. The console lid mounted screen of claim 5, wherein said frame is attached to said lid with at least one friction pinion, allowing said frame to remain stationary at any angle relative to said lid.

7. A console lid mounted screen comprising:

a frame pivotally attached to a console lid with at least one friction pinion;

a display screen defined within said frame;

said console lid having a compartment defined therein to receive said frame; and

the bottom side of said compartment having a substantially rigid surface.

8. The console lid mounted screen of claim 7, wherein said frame can pivot relative to said console lid and said friction pinion allows said frame to remain stationary in any position relative to said console lid.

9. The console lid mounted screen of claim 8, said frame having a closed position wherein said frame forms a substantially flat surface with said console lid and said screen is hidden from view.

10. The console lid mounted screen of claim 9, wherein said console lid has a hinge providing a pivotable connection to a console.

11. The console lid mounted screen of claim 10, wherein said console lid has an open and a closed position.
